

Dear Parents and New Fourth Grade Students,

Welcome to Fourth Grade! In this folder you will find required and optional enrichment activities for the fourth graders to complete over the summer break. These activities are designed to prepare you for the upcoming school year.

Required Work

For Math, students will work on their multiplication facts and complete the math packet, which is a review. Remember to show your work! It is imperative that students master their multiplication facts (0-12) before the start of the school year. Fourth graders will take a multiplication test the first week of school. There are websites listed under my 4th grade math websites to help reinforce these skills.

For Reading, students will read the novel, *Tales of a Fourth Grade Nothing*. They will complete a couple of activities relating to the novel. Students will be sharing their work the first week of school.

ALL required assignments are due **Tuesday, August 21**. All work should be completed neatly, labeled with the student's name, and returned in the folder provided.

Optional Activities

In addition to your required work, we have also provided additional activities for those of you who are looking for additional practice or preparation. These activities are encouraged but optional. They will help to further prepare you for the school year.

Just in case you need additional copies of this information all work will be available in .pdf format on our Fourth Grade Website! If you forget the link below just go to the Bethany Teacher Webpages link on the Bethany homepage. Choose Fourth Grade and then click the 2018 Summer Work tab on the left side of the page.

Have a fabulous summer!

Your Fourth Grade Teachers,
Mrs. Huff and Mr. Imwalle
