

ALEKS®

The *rate of learning* will vary depending on the level of mastery a student has achieved in a course.

The rubric below is based on the student reaching the minimum recommendation of **1hr/week in ALEKS**.

Summer Work Due Date August 21, 2018

Bethany School summer math work will be through Aleks. Students will be graded on each months weekly goals and their Aleks journal. The weekly goals are comprised of time and topics (rubric included). **The journal needs to have the date of each log in and problems numbered with computations.** The intent of the program is to have students log in weekly, however, we will be look at the overall monthly time/topic(4hrs/40 topics). **Students should not receive any help, especially during KNOWLEDGE CHECKS.** We will be checking to make sure students are spreading this out and not trying to get everything completed the last day of the month.

Parents, if you would like to receive updates you can have your child attach your email under settings or let one of us know.
