Grade 7 Immunization Requirements

Dear Parent/Guardian,

Ohio law mandates children have certain immunizations for school attendance.

Before entering the 7th grade in August, students must have received:

- 1.) One (1) dose of the Tdap (adult vaccine for Tetanus, Diphtheria, and Pertussis) and
- 2.) One (1) dose of MCV4 Meningococcal vaccine

You are receiving this letter now so that you may notify me if your child has already received the Tdap and Meningococcal vaccines or to make arrangements for your child to receive the immunizations.

If your child has already received the vaccines, complete the bottom of this letter and return it to me.

If your child has not already received the vaccines, contact your child's doctor/clinic to schedule an appointment. Please send updated vaccination information from your visit at that time. Thank you for your prompt attention and help in keeping the students up to date.

Thank you,

Krista Lands
Registered Nurse

REQUIRED BEFORE the first day of school in August
